

```
1 void example_type11() {  
2     // Memory leak  
3     int* leakyPtr = new int[10];  
4     Forgot to delete[] leakyPtr; // Leads to memory leak  
5  
6     // Double free  
7     int* doubleFreePtr = new int;  
8     delete doubleFreePtr;  
9     delete doubleFreePtr; // Runtime error: double free or corruption  
10  
11    // Using dangling pointer  
12    int* danglingPtr = new int;  
13    delete danglingPtr;  
14    *danglingPtr = 10; // Runtime error: using freed memory (dangling pointer)  
15 }
```
